Framless Luminous Panel

The **hansen Frameless Luminous Panel** is a flat luminaire with a very low overall depth.

What makes the **Frameless Luminous Panel** special is, as the name suggests, its uniform illumination right up to the edges.

The front face is made of high-quality acrylic glass and shines glare-free with uniform brightness. No bright spots are visible.

The **Frameless Luminous Panel** is tailor-made to customer specification.

The largest possible size is 1,000 x 2,000 mm, the smallest is 150 x 150 mm. Within these dimensions, any size can be produced with millimetre precision.
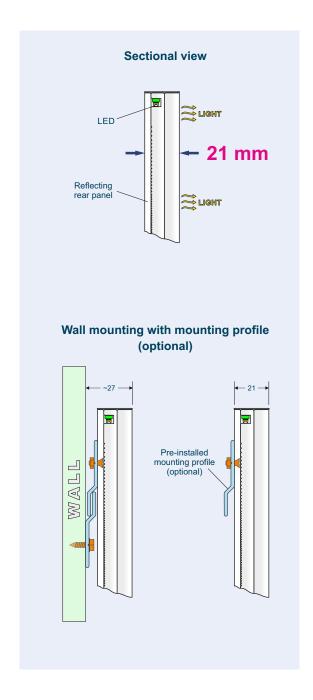

Applications

· **Frameless tailor-made** lighting element

· **Flush-mount luminaire** for integration into walls

· **Glare-free wall luminaire** for kitchens and bathrooms

· **Architectural lighting** in prestigious rooms

· **Backlighting** of acrylic, artificial stone or textile materials

· **Information signs** – foil graphics can be directly applied

Advantages at a glance

· **Custom dimensions:** The Luminous Panel is made to customer specification only.

· **Different colour temperatures:** The Luminous Panel can be supplied with warm light (2,700 K, 3,000 K), daylight-like (4,000 K, 5,000 K) or cool light (6,500 K).

· **Coloured light:** The Luminous Panel can also be supplied with coloured or RGB LEDs. The RGB LEDs allow colour changes or colourful light effects to be implemented.

· **Controllable:** The brightness or colour temperature of the Luminous Panel can be harmoniously dimmed with our innovative radio remote controls. RGB control is also possible.

· **Low energy consumption:** Thanks to modern LED technology, the Luminous Panel has a very low power consumption with a wattage of 25 watts per square metre.
