#### Secondary Data

4.000 V with 50 mA constant current, symmetrical alternating current, operating frequency approx. 27 kHz.

Suitable for blue discharge tubes.

Only partly suitable for red discharge tubes due to an occasional jelly bean effect.

#### **Connectable tube lengths (in metres):**

|                         | Blue | discha | rge (o | utdoor) | )    |      |  |  |

|                         |      |        |        |         |      |      |  |  |

The values given represent the maximum connectable tube lengths which must not be exceeded. Shorter tube lengths, however, may be connected without any restrictions. The tube lengths are calculated on the basis of the 'Filling Pressure Recommendations for Fluorescent Tubes' published by the German Fachverband Lichtwerbung.
